PROLOGUE

This report updates much of the data presented in the *1996 Factbook*. The document identifies the University's absolute position, and in many cases the institution's comparative position in relationship to peer institutions. Again this year, there may be some slight inconsistency in the figures in a few of the charts. This is a result of the timing difference in collecting some of the data for the *Factbook*.

The University's planning document, *Engagement In Learning*, is for the third year the focus of this year's *Factbook*. *Engagement In Learning*, approved by the faculty and the Board of Trustees in fall 1994 presents 75 goals that seek to move the institution toward even higher levels of achievement. This report makes a very positive statement about the University's current position in relation to its list of comparative colleges and universities. What is not captured in this report is the success the University has enjoyed in reaching many of the goals endorsed by the faculty and trustees in the fall of 1994. Information concerning the status of the 75 goals presented in *Engagement In Learning* is published in May of each year.

The *1997 Factbook* is divided into two primary sections. The first section, "A Profile of the University," presents a snapshot of several University characteristics. The second section, divided into seven parts, expands on much of the data shared in the summary, but does not attempt to analyze the exhibits included in each part.

Should you have questions regarding the report, or the manner in which the data was gathered or is presented, please call me or Ms. Judy M. Wilkinson, Administrative Assistant to the President and Research Associate.

Thank you for your interest in the University of Richmond and this report.

Chart 3, "First-Year Class Data, 1997," highlights the University's competitive position with averages of comparative colleges Groups I and II* in the areas of total applications, percent accepted and the percent of those accepted who matriculated (the yield), three measures of competitive strength in undergraduate admission.

CHART 3
FIRST-YEAR CLASS DATA, 1997

*For purposes of information, the Strategic Planning Committee identified two groups of highly selective colleges that were used for comparison in a variety of areas.

GROUP I

Bucknell University
Colgate University
College of the Holy Cross
Davidson College
Franklin & Marshall College
Furman University
Lafayette College
Stetson University
Trinity College (Conn.)
Trinity University (Texas)
Wake Forest University
Washington & Lee University

GROUP II

Amherst College
Bryn Mawr College
Carleton College
College of William and Mary
Dartmouth College
Oberlin College
Smith College
Swarthmore College
Wesleyan University (Conn.)
Williams College

FACULTY

The core of any college or university is to be found in its faculty. Three measures of a faculty can be found in its salary structure, student-faculty ratio and activity in the areas of publication and grant application.

Chart 4, "Average Faculty Salary by Year," compares the University salary structure with the averages of comparative college Groups I and II.

The reporting of the mid-range for test scores (scores between bottom and top quarters) is consistent with a recommendation made by the American Council on Education, The College Board, and other professional educational associations.

¹ In 1995, The College Board Testing Service recentered scores.

² Beginning in 1995, the achievement tests were renamed SAT II subject tests. The former English Composition became the Writing Subject Test.

MAY CPA EXAM RESULTS 1986-1994

Each May and each November, approximately 70,000 individuals sit for the national CPA Examination. According to the National Association of State Boards of Accountancy, these candidates have received their accounting education from over 600 colleges and universities throughout the United States.

Presented below are the May passing rates for colleges selected from accross the country from 1986-1994. These rates represent the percentage of candidates taking the CPA Examination for the first time without a graduate degree who pass at least one part of the CPA Exam.

- ¹ Number of faculty reported for each respective year in The Annual Report on the Economic Status of the Profession, Academe, Bulletin of the American Association of University Professors, March-April issue each year.
- ² Number of faculty reported to Academe in 1991-92 is lower than normal due to the fact that 13 tenure-track positions were filled by visiting appointments for the academic year.
- * Only faculty at the assistant professor level and above are reported. Figures reported under each division include visiting appointments and faculty on continuing, non-tenure-track appointments.
Administrators and librarians with faculty status are not included.

() indicates minority faculty members. Of the 18 minority faculty members, 11 are African American, 4 are Hispanic, and 3 are Asian/Pacific Islander. The table does not reflect other continuing full-time faculty including instructors or directors (23), or faculty on visiting appointments (27), for a total number of 281 full-time faculty. It does include faculty on sabbaticals, leaves of absence, and faculty who left during the session.

New faculty include tenure-track faculty, temporary appointments ranging from one semester to three-year appointments, year-long sabbatical replacements, visiting assistants, or visiting professors such as NEH or Freeman distinguished professorships.

Totals include men and women (of which the minorities are already counted).

* Includes newly-appointed faculty who later became tenure-track.

** In 1995, an African-American male was appointed with tenure and is not included in these "tenure-track" figures.

1996-97 FACULTY SALARY COMPARISON AAUP Annual Survey

The University of Richmond is classified as a IIA institution (Comprehensive Institution) in the AAUP's annual faculty salary survey. "These institutions are characterized by diverse post-baccalaureate programs (including first professional), but do not engage in significant doctoral-level education. ...these institutions must grant a minimum of thirty post-baccalaureate degrees and either grant degrees in three or more post-baccalaureate programs or, alternatively, have an interdisciplinary program at the post-baccalaureate level." (*Academe*, March-April, 1997, p 38.)

In 1996-97 495 of 551 IIA institutions participated in the survey, representing 98,787 or 28.0% of all faculty in the study. The largest number of faculty, 146,245, in the survey are at doctoral level (Level I) universities. There are over 50,509 faculty in the study at general baccalaureate (IIB) institutions.

The ratings (1*,1,2,3,4,) used in the survey represent "the percentile interval in which the institution's average salary in a given rank lies (1* = 95th percentile or above, 1 = 80th to 94.9 percentile, etc.) (Ibid.) (Emphasis added.)

* The number in parenthesis represents additional proposals which the records attribute only to "U of R." In 1984-85, for example, at least 8 of these are likely to have been the work of individual faculty. Following 1984-85 there seems to be a trend toward identifying more faculty by name.

** The numbers reported in earlier Factbooks inadvertently included administrators. The figures for 1989-90, 1990-91 & 1991-92 have been corrected to reflect only faculty.

GRADUATION SUMMARY OF THE UNIVERSITY OF RICHMOND STUDENT ATHLETES

In 1986 the National Collegiate Athletic Association (NCAA) standardized definitions for graduation rates of recruited student-athletes. Each year until 1991 this NCAA Academic-Reporting Form was used to report this information. The graduation rate was computed on a period ending on August 31 following the fifth year after the recruited freshmen student-athletes enter an institution as full-time students. Two rates were computed from this information. One rate allowed the inclusion of student-athletes who transferred from the University in good academic standing with those who graduate. The other rate only considered the student-athletes who started and finished at the University in five years.

1980-92	898/74.8	130/10.8	724 / 81%	854 / 95%	8946 / 6953 / 78% ¹

These figures reflect that 81% of all recruited student-athletes who enrolled at the University of Richmond during these twelve years (1980-81 to 1991-92) graduated in five years from the University and that 95% of these same student-athletes either graduated or transferred in good academic standing. A comparable figure for graduation of these recruited student-athletes with the regular student body reflects that the student-athletes have 81% who start and graduate from the University in five years vs. 78% for the regular student body during the same period.

In 1991 the NCAA changed to the Graduation-Rates Disclosure Form. This change aligned the NCAA reporting with legislation that was pending in Congress. The major differences between the NCAA's 1986 and 1991 forms are: (a.) a shift from an emphasis in **Recruited Student-Athletes** to an emphasis on **Freshman Student-Athletes Who Receive Athletics Related Aid**, (b.) a shift from totals for men's and women's sports to enrollment information on student-athletes who received athletics aid, by racial or ethnic group, by gender and by sport group, and (c.) a shift from graduation rates for recruited student-athletes who graduated in five years to the graduation rates for athletes who received athletics aid in their first year at the University who graduated in six, seven or eight years. It is not possible to make a meaningful comparison between the information in the NCAA Academic-Reporting Forms from 1986 through 1990 and the Graduation-Rates Disclosure Forms starting with 1991. The information in the OFFICIAL NCAA 1998 GRADUATION-RATES REPORT provides information on student-athletes entering in 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991. Each NCAA Division I institution has an OFFICIAL NCAA 1998 GRADUATION-RATES REPORT prepared by the NCAA, based on data provided by the institution, in compliance with NCAA legislation and the Federal Student Right-to-Know and Campus Security Act. These reports are distributed to all high schools in a 1998 NCAA DIVISION I GRADUATION-RATES REPORT book. The NCAA stipulates, "that a member institution is not permitted to alter or highlight the information contained in the report prepared by the Association."

END NOTE

1. This average and percentage does not include information from Westhampton College for students who enrolled during academic year 1980-81, the information reported for 1980-81 is for Richmond College only.

VIRGINIA FOUNDATION FOR INDEPENDENT COLLEGES GIVING

Approximately \$277,000 per year, this gift is designated primarily in support of the University's operating budget. The 1992-93 University of Richmond share was considerably larger as a result of a one-time gift of \$41,222 to offset the cost of our duPont Visiting faculty member. The University of Richmond continues to receive the largest percentage of VFIC dollars:

STATEMENT OF PURPOSE

UNIVERSITY OF RICHMOND

STATEMENT OF PURPOSE

The University of Richmond is an independent, privately-endowed institution of higher education that provides a comprehensive academic program for men and women. It offers the intimacy of a small university and the diverse educational opportunities that derive from undergraduate degree programs in the liberal arts and sciences, business, and leadership studies, as well as graduate and professional programs in law, business, and selected areas of the arts and sciences. The University also provides a variety of credit and continuing education programs as well as cultural events to the larger community. Historically related to the Baptist General Association of Virginia, the University affirms its commitment to serve individuals of all faiths and persuasions.

The educational objectives of the University are:

- to cultivate in students the interest, capacity, and skills necessary for independent intellectual inquiry and life-long learning;
- to convey to students a representative portion of that body of knowledge that has accumulated and endured through the history of world cultures;
- to encourage and aid students in the development of basic beliefs, values, and attitudes, including those of cooperation and tolerance;
- to assist students in selecting and preparing for careers and for study in graduate and professional schools;
- to foster in students personal habits that contribute to health and physical fitness.

In order to achieve these objectives, the University is committed to:

- an educational environment conducive to the development of the whole person--intellectually, socially, spiritually, physically, and morally;
- an academic setting that guarantees and encourages freedom of thought, expression, and association;
- an undergraduate curriculum that requires mastery of essential intellectual tools, awareness of the diversity of human cultural experiences, extensive knowledge of at least one area of study, and opportunities for interdisciplinary and integrative inquiry;
- a faculty dedicated to excellent teaching and dialogue with students, and active engagement in scholarship, scientific inquiry, and artistic creativity;
- a diverse, largely full-time and residential student body that participates in a broad range of University activities including opportunities for research, leadership, and the development of civic responsibility;
- the essential resources for learning, such as libraries, laboratories, studios, information and communications technology, and media resources;
- opportunities for internships, social commitment and public service, and other domestic and international learning experiences;
- a program of varied social, spiritual, and physical activities that provide occasions for growth, fun, and fellowship;
- an administration and staff that preserve and enhance the University's environment and resources, and that represent the institution to the broader community it serves.
